

Primeor E-Commerce Sales Analysis

Final Business Insights Report — SQL, Excel & Power BI
Dashboard Findings
Saurabh Jain

Executive Summary

A multi-market e-commerce business with concentrated sales, strong technology profitability, and a meaningful margin concern to address.

12.64M

Total Sales

1.47M

Total Profit

≈ 25K

Unique Orders

14%

Avg Discount

Market Performance

Key Insights

- **APAC** leads all markets at **3.58M** — primary focus for retention and expansion
- **EU** follows at 2.94M, a strong secondary market
- **Canada** is substantially smaller; distinguish low demand from limited coverage before investing

Regional Sales Breakdown

Regional Highlights

Central is the strongest region at **2.82M** — study which products, customers, and practices drive this performance.

South (1.60M) and North (1.25M) form a solid second tier.

Canada remains the smallest at 66,932.

Category & Sub-Category Profitability

Technology

Avg profit **65.46** — highest of all three categories

Furniture

Avg profit **29.00**

Office Supplies

Avg profit **16.58**

Top sub-categories by total profit: **Copiers 258.17K**, Phones 216.69K, Bookcases 161.70K, Appliances 141.68K, Chairs 141.68K. Profitability is not evenly distributed — category mix matters.

Top 10 Profitable Products

Product Insights

Copiers and Phones dominate the top-profit list. These are strong candidates for inventory planning and targeted promotions.

- ☐ Phones appear 5 times in the top 10 — a clear signal for category investment.

Top 10 Customers by Sales

Customer Strategy

Top customer **Tom Ashbrook** generated **40,489** in sales. The top-10 group are prime targets for **retention and cross-sell programs**.

Shipping Mode Usage

Fulfillment Insights

Standard Class dominates with **30,764** records — nearly 60% of all orders. Fulfillment cost and service-level performance should be monitored together given this concentration.

Negative Profit Alert

Negative-profit transactions identified

Identified via SQL analysis — a material signal requiring margin investigation.

Next step: Segment negative-profit transactions by product, category, market, discount level, and shipping cost to determine whether losses stem from pricing, excessive discounting, high fulfillment cost, or specific products/customers.

Recommended Actions & Dashboard

→ Protect High-Performing Markets

APAC and EU need focused attention on availability, retention, and product mix.

→ Review Loss-Making Transactions

Break negative-profit transactions down by market, product, and discount bands.

→ Prioritize Profitable Products

Leverage Copiers and Phones performance for inventory and promotion planning.

→ Manage High-Value Customers

Target top-sales customers with retention and cross-sell programs.

→ Use Discounts Selectively

Evaluate discount decisions against contribution margin, not sales volume alone.

❏ **Dashboard:** Power BI includes Executive Overview (KPIs + slicers), Sales Analysis (region, market, trend), and Product & Customer Insights pages. Workflow: cleaned data → SQL → Excel → Power BI → interactive dashboard.
